Product description:

What we are showing you now is model GT-600F. This model max paper width is 580 millimeters. This machine is a fully automatic hydraulic oil heating laminator, featuring computer touch screen adjustment, PLC control system and high-speed feeder paper feeding driven by a servo motor. It is equipped with an energy-saving frequency converter for speed control, an electromagnetic heating motor for independent speed regulation, and a fully automatic lifting platform. It has an automatic hydraulic pump enabling one-key pressure application and release. The air expansion shaft is for putting the film easily. The machine has automatic overlapping function, automatic lifting receiving table (with paper tapping function). The machine is with a large-diameter heating roller and is processed with high-brightness mirror finish; the pressure roller is a combination of Teflon and silica gel, resistant to pressure and non-sticky. After lamination, the products are not easy to peel and without edge cracking after creasing.
